Scan the QR code to display the latest version of this chapter.

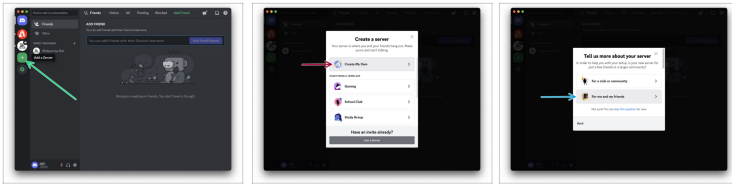

## STEP 1 Introduction

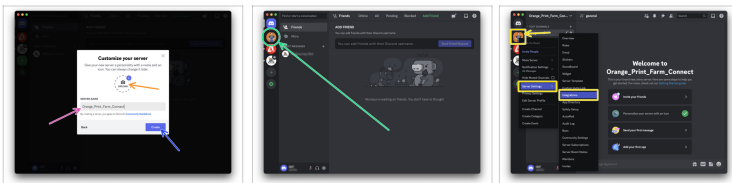

- ◆ In the following steps, we will set up Prusa Connect to send notifications to your **Discord** messaging app.
- ① **Discord** is primarily designed for group communication and can be downloaded for free at <https://discord.com/> for use on any major computer / phone platform.
- ◆ Download and start Discord on your computer. Log in with your user account.

## STEP 2 Establishing a server

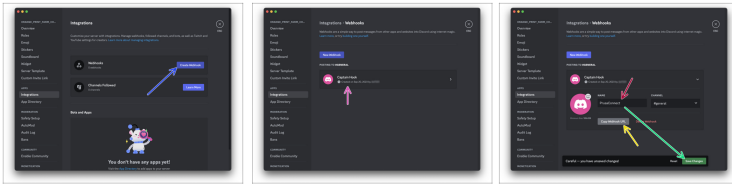

- You can use an existing Discord server where you have channel editing rights or create a new server as needed.
- To create a new server, click the + button on the left to **Add a Server**.
- In the following dialogs;
  - Select **Create My Own**.
  - Select **For me and my friends**.

## STEP 3 Server Settings

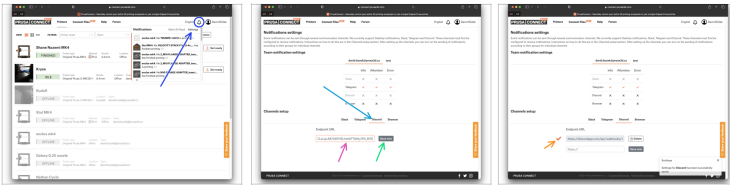

- Add a name for your new server.
- You can also add a custom icon for your server.
- Select **Create** to establish the server.
- Your newly created server is now accessible in the left menu.
- Right-click the new server icon and go to **Server Settings > Integrations**.

## STEP 4 Creating a webhook

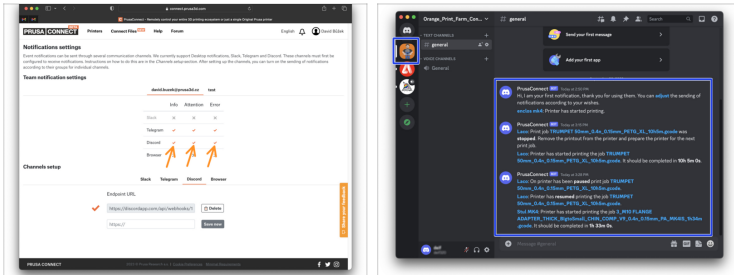

- ◆ Select **Create Webhook**.
- ◆ Click **Captain Hook** (the newly created Webhook bot)
- ◆ Add a **name** for the webhook bot.
- ◆ In case you're using multiple channels, specify which channel to use for the notifications.
- ◆ Click **Save Changes** on the bottom right.
- ◆ Click **Copy Webhook URL**
- ⓘ The Webhook URL has been copied into your clipboard.

## STEP 5 Prusa Connect settings

- 🛡️ Visit **Connect.Prusa3D.com** site and make sure you're logged in.
- 🔔 Click the **Notifications (Bell icon)** in the top-right corner and go to **Settings**.
- 🔗 In the Channels setup section, select **Discord** tab.
- 📄 Paste the **Webhook URL** from the clipboard into the **Endpoint URL** window.
- ✅ Click **Save new**.
- 🟡 After saving, a checkmark on the left should appear, and the initial test notification will be sent to confirm its functionality.

### STEP 6 Setting up Notification types

- 🟡 In the Notification settings, select all the notification types you want to receive on your Discord app.
- 🟢 Congratulations! You should now start receiving notifications about the ongoing prints through Discord.
- 🟠 If you're interested in delving deeper into Prusa printer remote control services, visit the [Prusa Connect and PrusaLink explained](#) article.
